

GLM Land Types - Version 1.3

The information on this map should be used as a guide only.

Legend

- Belmont Research Station
- Towns
- Watercourse on the vegetation management watercourse map (Stream order shown as black number against stream where available)

Land Types - Fitzroy

Alluvial Land Types

- Alluvial brigalow
- Blue gum / river red gum flats (FT)
- Box flats
- Coastal flats with mixed eucalypts on grey clays
- Coolibah floodplains (FT)

Land Types

- Narrow-leaved ironbark woodland
- Softwood scrub (FT)
- Cadastre Line

0 1 2 3 Kilometres

1:50,000

N

Projection.....Map Grid of Australia (MGA), Zone 56
Horizontal Datum.....Geocentric Datum of Australia 1994 (GDA94)

Black numbers and grid lines on the map are 2000 metre intervals.

The grid on this map is in Zone 56.

EXAMPLE MAP

GLM Land Types of Queensland is the spatial representation of Queensland Grazing Land Management (GLM) Land Types as described by the Queensland Department of Agriculture, Fisheries and Forestry (DAFF). The spatial representation of GLM land types has been produced by the Department of Natural Resources and Mines by correlating Queensland Grazing Land Management Land Type's (version 1.3) textual data with Pre-clearing Vegetation Communities and Regional Ecosystems of Queensland (version 6b) spatial data.

All datasets are updated as they become available to provide the most current information as of the date shown on this map.

Produced by AgForce Projects
09 March 2015

The map displays a landscape with various land types color-coded according to the legend. A network of watercourses is shown in blue, with stream orders indicated by black numbers (1, 2, 3, 4, 5, 6). Towns are marked with black dots. A large area in the center is outlined with a thick black line, representing the Belmont Research Station. The map is overlaid with a grid of 2000m intervals, with coordinates ranging from 228000 to 240000 Easting and 7422000 to 7434000 Northing.
